DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 12, 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Vallencourt, U.S. Patent # 6,121,836.

Fig. 2 of Vallencourt discloses an amplifier comprising: signals at differential inputs 120A, 120B can be read as a differential signal; transistors 110A, 112A can be read as a first differential pair; transistors 110B, 112B can be read as a second differential pair; transistors 122A, 122B can be read as a differential offset circuit.

Regarding claims 17-20, although Vallencourt does not have a method of extending an input signal written out structurally, his method resides inherently in his apparatus.

Allowable Subject Matter

Claims 2, 3, 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 5-11 are allowed.

Application/Control Number: 10/015,887

Art Unit: 2817

The following is a statement of reasons for the indication of allowable subject matter: prior art does not teach nor render obvious an amplifier that has, in combination with other limitations, a differential switch circuit.

Drawings

Figures 1, 2, 5, 6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S Patents # 5,280,199 of Itakura, # 5,142,238 of White contain some limitations of the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia T. Nguyen whose telephone number is (703) 308-1927. The examiner can normally be reached on 6:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (703) 308-4909. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-0142 for regular communications and (703) 305-0142 for After Final communications.

Application/Control Number: 10/015,887

Art Unit: 2817

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
